PROBLEMS

- **Hyperinflation in Africa**

Inflation rate in Sub-Saharan Africa is expected to grow to 12.2 percent.

- **Inflexible Alternatives**

Citizens are converting their local currency to USD via banks to hedge against inflation via banks with extra cost overhead.

- **Impulse Spending**

With advanced marketing strategies, and panic, users are making bad financial decisions hastily.

GIVVIE SOLUTION

Low Savings Engagement:

- We help the user easily convert their naira to USDC and save them securely on the blockchain. Helping them hedge against inflation.

Goal Achievement:

- With a lock feature, users can safely secure their funds until a later time. This helps them develop healthy savings habits.

Impulse Spending Control:

- We charge a fee when a user breaks their savings before their set time. Users can visualize their on-chain savings pattern and also earn GIVV tokens that unlock more features,
